## **DETAILED ACTION**

### ***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Richard Martinelli on 20 October 2003.

The application has been amended as follows:

**In Claim 1, line 8, the phrase "so that to" has been changed to --so as to--.**

**In Claim 1, line 9, the word "channels" has been changed to --channel--.**

**In Claim 6, line 3, the second occurrence of the phrase "than that" has been deleted.**

**In Claim 7, line 2, the phrase "the section of" has been deleted.**

### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

Applicant's arguments are persuasive. The prior art does not teach a device having a separate discharge channel, besides the output channel. The dedicated

Art Unit: 3763

discharge channel, allows for the release of injected irrigation fluid when the main outlet channel becomes occluded with rinsed debris.

Note that the closest prior art includes US Pat No. 2,421,294, which teaches connection of the inlet passageway with the outlet via chamber 15. However, there is no separate discharge channel.

The Examiner also cites herein US 6,155,987 to Scherl. Scherl also teaches a connection with an outlet channel, prior to the exit of the inlet channel (see figures 10 and 11). But again, there is no separate inlet channel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
